Precision workmanship on fittings prevents leakage.  
High efficiency tubes and fins produce maximum heat transfer.  
Louvered fin design provides improved airflow and performance.  
Thin cross tube profile decreases air resistance for improved airflow.  
Nocolok brazing technology leads to uniformity and strong braze joints,  
resulting in leak-free durability  
Large and continually expanding product range  
Highest level of quality-designed to be equal or better than the OE
